

Video/Audio Settings

Using this control you can adjust your video and audio settings, including compression, size, framerate, audio settings, etc. Fullscreen video is also an option.

Video/Audio Streams

All 5 Avalite users can have video and audio, or just audio. Streams can be fullscreen, shown in a bar, an L-shape, and as a central video with four corner streams.

Sharing

This menu gives access to Avalite's 3 main sharing features: screen sharing, file sharing and web touring. Screen sharing will launch a window called the AvaHost, which will allow you to select the area of the screen to share.

Branding

The background, colors, and logo are all customizable to match your look and feel.

Layouts

This pop-up menu gives access to the 10 different layout options, all of which are selectable dynamically.

The layouts:

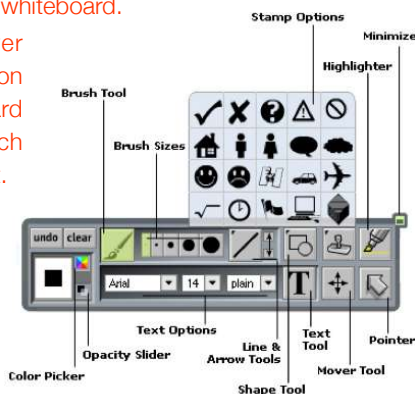

1. All features, large video
2. All features, small video
3. No chat, large video
4. No chat, medium video
5. Large slides, no video
6. Large chatroom, no video
7. All features, very large video
8. No chat, very large video
9. Conference 1, band of video
10. Conference 2, L-form video

Whiteboard Tools

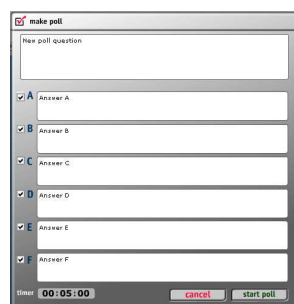

This movable palette of tools provides all users with the ability to annotate slides. Each slide has its own independent whiteboard.

Mousing over any element on the whiteboard displays which user added it.

Polling

Clicking the poll button opens a window where you can make a poll and set a poll timer. The poll is sent to all participants, and results are available via Avalite Reports.

Slide Controls

Slides can be changed using the forward/back arrow buttons, or selected via the pop-up list of slides. Slide decks, in either PowerPoint or Flash format, can be uploaded right from your computer via the 'upload' button. Avalite supports animated and interactive Flash-based slides as well as static PowerPoint slides.
